Easy to use

You expect a state-of-the-art hands-free kit to offer excellent sound quality, be easy to use, and ensure you stay safe on the move. And with a touchscreen and the new DialogPlus voice control system, the CC 9060 does just that.

CC 9060

Crystal-clear sound Cutting-edge design

The speaker-independent DialogPlus voice control has a unique word recognition system which is both fast and highly accurate. However complicated a name sounds, however quickly you say a telephone number, the CC 9060 responds to your voice immediately – and isn't affected by background noise.

To help you use the voice control function effectively, the system provides clear visual and audio prompts, making for a highly user-friendly and enjoyable experience. And thanks to text-to-speech functionality, the CC 9060 can also read text messages out loud – so you get the information you need without needing to look at the phone's display.

From the very start of the design process, we were firmly focused on providing a user-friendly system that will help drivers stay safe on the roads. Why don't you see for yourself?

AND I READ OUT
TEXT MESSAGES.

Can be mounted on the dashboard or the windscreen.

Window mount also available
